

LEAD TRAINING CLASSES 2011

September & October

CLASS SIZE IS LIMITED—REGISTER TODAY—MOST TRAININGS ARE FREE**

Funding provided by the Albany County Department of Health and the Rensselaer County Health Department

Effective April 22, 2010, workers performing renovation, repair and painting projects that disturb lead-based paint in homes, child care facilities, and schools built before 1978 must follow specific work practices to prevent lead contamination and must be certified. This new federal EPA Renovation, Repair, and Painting (RRP) rule applies to contractors, painters, plumbers, carpenters, electricians, window replacers, roofers, property owners, and landlords.

Trainings to become certified are being offered by Cornell Cooperative Extension Albany County.

The Lead Safe Work Practices trainings are based on EPA's and HUD's previous model courses in lead-safe work practices. This course satisfies HUD requirements for interim controls in federally assisted housing. Individuals must have a certificate from a prior EPA or HUD lead training (e.g. Lead Safe Work Practices or certified lead abatement worker) to attend a RRP Refresher course. The RRP trainings are taught by an EPA certified training provider.

Upon successful completion of the RRP Refresher course including passing an exam at the end of the class, participants are RRP certified by the EPA for 5 years.

Failure to comply with EPA's RRP program requirements could result in penalties of up to \$37,500 per day per violation.

- **Continental breakfast and lunch will be provided for full day programs**
- **Refreshments and course materials will be provided for all trainings**
- **Participants must pre-register**

Register-Send completed form below to:
Lead Training, P.O. Box 497, 24 Martin Road
Voorheesville, NY 12186
