

## **Montgomery-Otsego-Schoharie Solid Waste Management Authority**

General Guidelines for the  
Northern Convenience Station  
5802 State Hwy 28  
Cooperstown, N.Y.

### **Homeowner Use Only –**

So as to maintain a safe operation, this site is only to be used by individual homeowners for the disposal of household waste. Household waste is any waste generated from a single household that is delivered by a resident of the household.

### **Standard for Charges --**

Waste may be delivered in thirty (30 - 35) gallon bags or containers for the “bag” rate established by the Governing Board annually. So long as scales are operational at the site, material may be delivered in bulk form and the charge will be by weight with a minimum fee in place for such material.

### **Means of Delivery –**

Material may be delivered in a vehicle designed for and typically recognized for family transportation to and from work, community events, shopping and the like or an unmodified pickup truck, i.e. without side racks.

No deliveries may be made by using trailers, dump trucks, modified pickup trucks, cargo vans or other types of business / special use vehicles.

### **Business / Municipal Use –**

The Station is not to be used by businesses, persons or firms collecting waste from multiple households for a fee or by contractors disposing of waste generated on a construction / project site. Waste collected by municipalities is considered the same as that collected by businesses and haulers and is not accepted.

### **Operating Procedures –**

Homeowners must comply with Operating Procedures at all time. A copy is available from the weigh station operator.
